

Wihem Maamer

Nationality: Tunisian | **Phone:** (+40) 734568826 (Mobile) | **Email address:** wihemdonix@gmail.com | **Website:** <https://github.com/Wihem55> | **LinkedIn:** www.linkedin.com/in/wihem-maamer | **Address:** Romania (Home)

● ABOUT ME

Here's a polished version that makes it clear you **recently graduated**:

Recently graduated in Advanced Cybersecurity Engineering from the Polytechnic University of Bucharest, with experience in software development and security-focused projects. Developed a phishing detection, scanning, and simulation platform using Python and Flask. Skilled in web and mobile development, with hands-on experience using cybersecurity tools such as Kali Linux and Burp Suite. Fluent in Arabic, French, and English. Seeking **junior opportunities in cybersecurity or software development** across Europe.

● WORK EXPERIENCE

HIGH SCHOOL DIPLOMA IN COMPUTER SCIENCE- IBN ABI DHIAF HIGH SCHOOL, MANOUBA

Field(s) of study: Computer Science | **Level in EQF:** 4

● **LANGUAGE SKILLS**

Mother tongue(s): **ARABIC - NATIVE**

Other language(s): **ENGLISH - FLUENT** | **FRENCH - FLUENT** | **TURKISH - INTERMEDIATE**

● **SKILLS**

Programming Languages

Python | Java | PHP | JavaScript | C | C# | C++

Frameworks & Technologies

Flutter | Flask | HTML5 | Bootstrap | Spring Boot | CSS3 | NestJS

Databases

SQL | MySQL | MongoDB | Firebase | PL/SQL

Development & Tools

GitHub | Git | API Integration | Responsive Design | XAMPP

Cybersecurity Tools

Kali Linux | Linux | Ghidra | Burp Suite | JADX | Wireshark

● PROJECTS

- Developed a cybersecurity platform to **detect, scan, and simulate phishing attacks**.
- Implemented URL analysis and user interaction tracking features.
- Built using **Python and Flask**, focusing on web security, threat analysis, and user behavior monitoring.

Link <https://github.com/Wihem55>

- Contributed to a mobile application for **solvency evaluation and staggered payment analysis**.
- Worked on application features and usability improvements.
- Developed using **Flutter and Firebase**.

Link <https://github.com/Wihem55>

- Developed features for a mobile health application using **Flutter and NestJS**.
- Implemented user-facing functionalities and improved app performance.

Link <https://github.com/Wihem55>

- This project is a modern e-commerce web application focused on gaming products such as PCs, accessories, and streaming gear. It allows users to browse products, view detailed information, and purchase items through a complete shopping cart and checkout system using PHP, HTML, CSS, JavaScript
- The platform also includes an admin dashboard for managing users, products, and orders.

Link <https://github.com/Wihem55>

- Developed a backend application using **Java Spring Boot** with database integration.
- Implemented core CRUD functionalities and API logic.
