Nationality: Tunisian

ABOUT MYSELF

I'm a Master's student in Advanced Cybersecurity Engineering at the Polytechnic University of Bucharest with experience in software development and security-focused projects. Developed a phishing detection, scanning, and simulation platform using Python and Flask. Skilled in web and mobile development and cybersecurity tools such as Kali Linux and Burp Suite. Fluent in Arabic, French, and English. Seeking an internship or junior role in cybersecurity or software development.

Open to internship and entry-level opportunities across Europe.

WORK EXPERIENCE

SC Call Point New Europe SRL – Telus Digital

<https://www.telusdigital.com/about/locations/romania>

City: Bucharest | **Country:** Romania

Customer Support Ambassador – Airbnb French Team

- Supported French-speaking customers with account, booking, and service-related issues.
- Helped improve team communication and represented team needs in a multicultural work environment.
- Strengthened communication, problem-solving, and customer incident-handling skills.

SmartEco <https://www.smarteco-universe.com>

City: Tunis | **Country:** Tunisia

Mobile application developer

- Contributed to the development of the **PayFlex mobile application** for solvency evaluation and installment payment analysis.
- Participated in feature development, usability improvements, and application testing.
- Assisted in debugging and improving application performance.
- Collaborated with team members on application logic and user experience.

IT GUST <https://itgust-group.com>

City: Tunis | **Country:** Tunisia

Intern in Application Development

- Developed features for the **Med For You mobile application** using **Flutter** and **NestJS**
- Assisted in implementing backend and frontend functionalities for user-facing features.
- Participated in testing, debugging, and improving application performance.

Freelance / Remote Project

City: Remote | **Country:** Tunisia

Freelance Content Reviewer

- Reviewed and moderated online content to ensure compliance with platform policies.
- Identified and reported inappropriate or harmful content.
- Maintained high accuracy and consistency while working independently.
- Developed strong attention to detail and analytical decision-making skills.

EDUCATION & TRAINING

[Current]

Master's Degree in Advanced Cybersecurity Engineering

Polytechnic University of Bucharest

City: Bucharest | **Country:** Romania | **Field(s) of study:** Cybersecurity Engineering | **Level in EQF:** 7 | **Thesis:** AI-Powered Phishing Detection, Scanning and Simulation Platform

- Network security and system protection
- Web and mobile application security
- Penetration testing fundamentals
- Cybersecurity tools (Kali Linux, Wireshark...)
- Secure software development

Bachelor's Degree in Business Information Systems

ESEN – École Supérieure d'Économie Numérique

City: Manouba | **Country:** Tunisia | **Field(s) of study:** Business computing, Information Systems / Software Development | **Level in EQF:** 6

- Software development fundamentals
- Database systems (SQL, PL/SQL)
- Web development (HTML, CSS, JavaScript, PHP, JAVA, C, C#)
- Object-oriented programming
- Information systems management

High School Diploma in Computer Science

Lycée Ibn Abi Dhiaf

City: Manouba | **Country:** Tunisia | **Field(s) of study:** Computer Science | **Level in EQF:** 4

LANGUAGE SKILLS

Mother tongue(s): Arabic - Native

Other language(s): English - Fluent | French - Fluent | Turkish - Beginner

SKILLS

Programming Languages

Python | Java | PHP | JavaScript | C | C# | C++

Frameworks & Technologies

Flutter | Flask | HTML5 | Bootstrap | Spring Boot | CSS3 | NestJS

Databases

SQL | MySQL | MongoDB | Firebase | PL/SQL

Development & Tools

GitHub | Git | API Integration | Responsive Design | XAMPP

Cybersecurity Tools

Kali Linux | Linux | Ghidra | Burp Suite | JADX | Wireshark

SOFT SKILLS

Teamwork \ Communication \ Problem-solving \ Adaptability \ Time management \ Analytical thinking

PROJECTS

AI-Powered Phishing Detection, Scanning and Simulation Platform

- Developed a cybersecurity platform to **detect, scan, and simulate phishing attacks**
- Implemented URL analysis and user interaction tracking features.
- Built using **Python and Flask**, focusing on web security, threat analysis, and user behavior monitoring.

Link: <https://github.com/Wihem55>

PayFlex Mobile Application

- Contributed to a mobile application for **solvency evaluation and staggered payment analysis**
- Worked on application features and usability improvements.
- Developed using **Flutter and Firebase**.

Link: <https://github.com/Wihem55>

Med For You Mobile Application

- Developed features for a mobile health application using **Flutter and NestJS**.
- Implemented user-facing functionalities and improved app performance.

Link: <https://github.com/Wihem55>

Gaming-Team-E-Commerce-Platform

- This project is a modern e-commerce web application focused on gaming products such as PCs, accessories, and streaming gear. It allows users to browse products, view detailed information, and purchase items through a complete shopping cart and checkout system using PHP, HTML, CSS, JavaScript
- The platform also includes an admin dashboard for managing users, products, and orders.

Link: <https://github.com/Wihem55>

Spring Boot CRUD Application

- Developed a backend application using **Java Spring Boot** with database integration.
- Implemented core CRUD functionalities and API logic.

Network scanner

- It's a network scanner used to scan any range of IP Address to get their MAC Address.
- The code is written completely in Python
- This program is supported for Linux, Windows and Mac OS X.
